HIRE-4-THON Guidelines

We Assure

that the hackathon conducted by Dyashin will provide an engaging, collaborative, and enriching environment for participants to showcase their skills and innovate solutions, while receiving valuable guidance from industry experts.

Eligibility & Team Formation

- ☐ The Hackathon is open to currently enrolled engineering college students pursuing undergraduate or postgraduate degrees.
- ☐ Participants must provide/display a valid student ID during registration(24hrs).
- ☐ Participation is allowed in teams of 2-4 members.
- ☐ Teams may consist of students from different disciplines and academic years.
- ☐ Each team must designate a **team leader** for communication with organizers.
- ☐ **No changes to team members are allowed after the Hackathon begins.**

Evaluation Rounds

Dyashin

Round 1: Design Round (4 Hrs)

In the design round, participants will have the opportunity to demonstrate their creativity and problem-solving skills by developing user-centric, innovative designs that align with real-world requirements, ensuring a seamless and intuitive user experience. **In this round participants should not use Internet Connection.**

Round 2: Implementation Round (18 Hrs)

In the Implementation Round, participants will bring their ideas to life by developing working prototypes, demonstrating the practical application of their solutions to real-world challenges within the given timeframe. **Participants are free to use Internet in this round.**

Round 3: Presentation Round (2 Hrs)

During the Presentation Round, participants will have the opportunity to showcase their solutions, explain their approach, and demonstrate the impact of their innovations to a panel of judges, highlighting the creativity and technical skills behind their work.

Round 4: Closing Ceremony & Prizes

The Closing Ceremony will celebrate the outstanding achievements of all participants, with special recognition for the top teams, as we announce the winners and present the well-deserved prizes for their innovative solutions and dedication throughout the hackathon.

Round 1: Design Round (4 Hrs)

- ❖ Teams will be provided with a problem statement at the start of the Hackathon.
- ❖ Teams must create a comprehensive design document that includes:
 - UI/UX screens (hand-drawn or digital) showcasing the user journey and interaction flow.
 - Different user roles and their corresponding responsibilities within the system.
 - Database design outlining tables, relationships, and primary fields.
 - Innovative ideas or unique features planned for implementation.
 - Tech stack (technologies, languages, frameworks) to be used for development.
 - Any additional relevant documentation or diagrams (e.g., flowcharts, ER diagrams).
- ❖ Evaluation for this round will take place after 4 hours. Teams must be ready to submit their designs by this time.
- ❖ **Disqualification:** Teams that fail to meet the design criteria or submit incomplete designs will be disqualified from the Hackathon.

Round 2: Implementation Round (18 Hrs)

- ❑ Shortlisted teams from the Design Round will move to the Implementation Round.
- ❑ In this phase, teams can use their own devices such as laptops, mobile phones, and any other necessary equipment.
- ❑ Teams must implement the solution based on the design document, ensuring the following:
 - A working prototype of the solution with functional frontend and backend integration.
 - Database integration should reflect the design submitted during Round 1.
 - The solution should demonstrate basic functionality, allowing for a demo of key features.
 - A presentation outlining the solution, challenges faced, and key technical components must be prepared.
- ❑ Evaluation will take place within the scheduled time slot, and all submissions must be completed before the specified deadline.
- ❑ **Disqualification:** Teams that fail to produce a working model or do not meet the implementation criteria will be disqualified.

Round 3: Presentation Round (2 Hrs)

- ☐ Selected teams from the Implementation Round will proceed to the final Presentation Round.
- ☐ Teams will present their working solution to a panel of judges, which should include:
 - A live demo showcasing the functionality and user flow.
 - A presentation discussing the implementation process, challenges, and innovative aspects of the solution.
 - Q&A session with the panel regarding the technical decisions and future scope of the solution.
- ☐ The top 3 teams will be selected based on their presentation, demo, and overall solution.

Round 4: Closing Ceremony & Prizes

- ☐ The Closing Ceremony will include the announcement of winners, followed by the distribution of prizes to the top 3 teams.
- ☐ The event will conclude with a vote of thanks and acknowledgments from the organizers.
- ☐ Prizes will be awarded to the top 3 teams based on their performance in the final round.
- ☐ The organizers reserve the right to modify the prize structure.
- ☐ All participants will receive certificates of participation.

Please Note

- ☐ All projects must be created during the Hackathon timeframe. No pre-existing projects or prototypes will be accepted.
- ☐ Teams must use original work and not include any plagiarized material. Use of open-source libraries is allowed but must be properly attributed.
- ☐ Submissions must include:
 1. Source code (preferably in a public GitHub repository)
 2. Documentation and design elements prepared in Round 1
 3. A demo or presentation file

Dyashin

Please Note

- ☐ The organizers are not responsible for any damage or loss of personal devices, equipment, or data during the Hackathon.
- ☐ Participants assume full responsibility for their participation and any associated risks.
- ☐ The organizers reserve the right to amend these terms and conditions at any time without prior notice.
- ☐ Any changes will be communicated to participants.

Dyashin

Code of Conduct

- ☐ Participants are expected to maintain a respectful and professional environment throughout the Hackathon.
- ☐ Any form of harassment, inappropriate behaviour, or discrimination will result in immediate disqualification.
- ☐ Participants must adhere to the event's code of conduct and ensure fair play.
- ☐ **Teams will be disqualified if they fail to meet the specific criteria for each round or engage in unethical conduct, such as plagiarism, cheating, or disrespectful behaviour.**
- ☐ Any teams failing to submit their work by the deadlines for each round will also be disqualified.

wish you

ALL THE BEST
